Stain/Paint Colormatch Sign-off Sheet

Date_____

Please review the enclosed samples. Please note: Your colors will range between these samples due to many different variations in the wood.

Due to the development of distinctive grain patterns and mineral streaks, color may vary. The color, grain, and texture variations that develop are what make wood unique and are a part of the intricate beauty of fine hardwoods. The unique characteristics of wood are natural, and neither the manufacturer nor the dealer can take responsibility for the conditions described. Color and stain samples do not always give the true representation of the color you will get.

Note: Due to the natural characteristics of wood. Darker stains can create a non-uniform appearance and are NOT a reason for replacement of product.

The undersigned dealer and/or customer has been advised of the stain color, acknowledging the color may vary due to the graining, texture and coloration of the wood materials used by the interior millwork department of North Central Wood Products. The undersigned hereby agrees and approves such color match, as per the samples presented to the dealer and/or customer.
